COAM SLIDE & VIDEO MAGAZINE

Engr. Marco Santel

Message from the COAM Hub technical director

Welcome to the viewing and reading of the first issue of our downloadable slide & video magazine in pdf format, produced by COAM, where you will be able to find information, technical articles, tutorial videos and video reviews concerning the most original, innovative and technically advanced elevators.

In addition to our technicians and communication officers, to realize the magazine contents we have chosen collaborators who we can define "social", such as tourists and the ones who travel around the world for culture, adventure, holidays or work and who often come across hydraulic elevators and carlifts, realized with pistons, power units and valves provided by COAM or not, and they have the courtesy to make videos to share with us and to publish on their social.

Obviously we will review elevators and carlifts concerning not only COAM; our aim is to participate in the disclosure of the technology of the hydraulic lifting, so we will have an eye on all those particular and technically advanced solutions that every day bring to new solutions, both from a technical, logistic, architectural and environmental point of view in the vertical transport of people and goods, regardless of who makes them.

From 1988 COAM technology is present at the Louvre in Paris

Attractiveness, great and continuous use, overcoming architectural barriers and technical innovation in the hydraulic vertical transport of people at Louvre in Paris, where COAM components are present from 1988 in the innovative, for that time, elevator with hydraulic piston still in use.

The original elevator was installed by Schindler, adopting components for the hydraulic lifting designed and produced by COAM.

We have selected three original videos, recorded by tourists, who use this installation with a strong attractive impact.

COAM

Special contributions for the Architectural Design

Special project for COAM, flagpoles at the City Gate of **Malta**, structure built by Renzo Piano, who for such important elements as the two gate flagpoles chose the precision, the procession quality and the adequate technical structure that COAM has.

From the video channel “Italiani a Malta” a trip to the Valletta City Gate to admire the work signed by **Renzo Piano** and the kindness of the symbolic **flagpoles** that welcome the tourists and whoever goes to the Maltese capital.

Notes: In COAM Hub free assistance and consulting tickets are available for installers, designers and companies in the elevators and carlifts world. The subscription is free on the website <https://www.coamhub.it/>

COAM

Present in another prestigious European Museum

A trip to the Europäisches Hansemuseum in Lübeck where, among the marvels exhibited, you can see the original hydraulic elevator realized using COAM components.
Enjoy the video of this interesting trip from the official channel of the Europäisches Hansemuseum.

Notes: In Coam Hub periodic webinar about vertical transport technologies are waiting for you. Participation is for operators in the sector in <https://www.coamhub.it> - the subscription is free.

We report that **the first webinar event** of 2020 is under construction and it will be online in our hub starting from next February.

Technicians, designers, entrepreneurs and company managers who wish to be contacted to illustrate solutions, products, projects and offers for the webinar or for communication campaigns towards B2B market can contact the editorial office. Interviews, articles and editorials are free and published at our discretion.

On our hub: Replacement of the seals kit on a cylinder type 4PK

The new tutorial video in Italian and English is online! It's about seals replacement of a 4PK piston, realized by the engineering department of COAM.

This tutorial video shows the instructions and every operation in the seals replacement process, step by step, so that you can do it correctly.

The video is available in Italian and English languages for people registered in <https://www.coamhub.it> - the subscription is free.

COAM House Organ dedicated to information about technologies, sustainability, solutions, design and events in the area of the vertical lifting of people and goods through the use of hydraulic elevators and car lifts. Review of videos, information and images from all over the world.

n. 1 - 2019
